## EDUCATION

### MCMASTER UNIVERSITY

Hamilton, ON, Canada

Bachelor of Engineering & Biomedical Engineering - 3.8/4.0 GPA

*Final Year*

Specialization: Mechatronics Engineering

## WORK EXPERIENCE

### MECHATRONICS ENGINEERING INTERN

Alliston, ON, Canada

#### *Honda of Canada Manufacturing*

*May 2024 - Aug 2025*

- Served as a project lead on multiple department projects, managing scope, timelines, stakeholder requirements, and workload support from other associates.
- Acted as the department SME for all production data collection, improved data reliability from first quartile to being the #1 department plant-wide by troubleshooting PLC/HMI logic and developing automated reporting solutions using Excel VBA and other internal reporting solutions.
- Supported the electrical design and upkeep of manufacturing equipment, including creating and updating electrical drawings, installing and validating 24-600V control panels, and ensuring code compliance through ESA inspections.
- Designed and modelled steel/aluminum components for new equipment installation, validated completed assemblies, coordinated with machine shops for fabrication, and installed the delivered components.

### LV ELECTRONICS TEAM MEMBER

Hamilton, ON, Canada

#### *McMaster Formula Electric*

*Oct 2023 - Feb 2026*

- Designed and iterated low-voltage control PCBs using Altium Designer and validated circuits through LTSpice simulations.
- Assembled, tested, and reworked PCBs in-house using oven reflow soldering, hot-air rework, and bench-level debugging tools such as meters and scopes.
- Developed a hardware-in-the-loop (HIL) test system to validate board functionality under simulated vehicle conditions prior to integration into the car.

### RIDES ELECTRICAL TECHNICIAN

Vaughan, ON, Canada

#### *Canada's Wonderland*

*Mar 2022 - Oct 2022 | Mar 2023 - Oct 2023*

- Promptly responded to ride downtimes and utilized electrical diagnostic equipment to resolve the root cause of issues, repair them, and get rides up and running in a timely manner.
- Conducted routine daily/weekly/monthly inspections and preventive maintenance on electrical ride systems, adhering to TSSA and manufacturer guidelines.
- Executed electrical installations, rewires, and upgrades while complying with electrical codes.
- Utilized lockout/tagout procedures to ensure safe maintenance on AC/DC systems up to 600V.

## SKILLS

**Electrical:** *PCB Design* (KiCad/Altium), *Microcontrollers* (STM32, ESP32, Arduino), *Circuit Analysis and Simulation* (Multisim, Simulink, LTSpice), *Electrical Assembly and Installation* (PCBA, Panel Wiring)  
**Software:** *Languages* (C/C++, Python, Matlab, Excel VBA), *PLC Programming* (Mitsubishi, Allen Bradley), *HMI Design* (Mitsubishi), *Data Collection* (ActivPlant, Excel)  
**Mechanical:** *CAD* (Onshape, Solidworks, Catia V5) *Mechanical Design* (DFM/DFA, GD&T, Static and Dynamic Calculations), *Fabrication and Assembly* (3D Printing, Machined Part Assembly)
